### 3.2 Installation

To install pymad8, simply run `make install` from the root pymad8 directory.:

```
cd /my/path/to/repositories/  
git clone http://bitbucket.org/jairhul/pymad8  
cd pymad8  
make install
```

Alternatively, run `make develop` from the same directory to ensure that any local changes are picked up.

## CONVERTING MODELS

pymad8 provides converters to allow BDSIM models to be prepared from optical descriptions in MAD8.
